local +

MISSOULA--

A lecture on appropriate technology, which is business or industry that focuses on small and local development, will be given at 8 p.m. Thursday, May 5, in the University Center (UC) Lounge at the University of Montana.

James Schmidt, executive coordinator of the National Center for Appropriate Technology (NCAT), headquartered in Butte, will deliver the free public lecture.

A public reception will follow the lecture in the UC Lounge.

Schmidt will discuss appropriate technology and its relationship to high technology, which is characterized by computerization and volume. He also will discuss President Carter's energy policy.

The purpose of NCAT is to fund appropriate developments in communities, provide technical help to persons interested in appropriate development and to gather and disseminate information about the field.
